Guessing the Five Levels of Moderate to Severe Desynchronized Pain

	Level	I Feel	Pain Resolves with	Symptom	Defense	Skills Needed	Diagnostic Indicators	Roll of Communication	Tests for levels
↑	Level 5 Left Prefrontal Cortex	Confused	More information	Internal conflict	Explain, blame, accuse, justify	Godsight	If I am focused on what other people think or on rules I am likely in level 5 pain.	Resolved by good communication.	Information or understanding will solve the problem without a person needing to be involved (the right document would work).
↑	Level 4 Right Prefrontal Cortex	Inadequate	An example	Immaturity	React or try to control	Act like myself	If I have gotten focused on doing instead of being I am likely having level 4 problems.	Not resolved by communication alone (needs mature example too).	Level four pain always realizes that "I am having an effect on you too" and continues to try to minimize the persons own negative impact
↑	Level 3 Cingulate Cortex	Overwhelmed	Mirroring	Stuck in "big six"	Try to make them understand me	Mindsight	If I am still trying to get other people to understand me I am at level 3 or higher.	Not resolved by communication alone (needs shared feelings too).	It is all about them but they want you to understand their feelings. When they want you to share their fear it is level 3 pain not level 2 pervasive fear.
↑	Level 2 Amygdala	Disconnected	Quieting	Not listening	Make it stop	Self quieting	If the bad thing that scares me has my attention or I withdraw from others I am in level 2 pain or below.	Not resolved by communication AT ALL.	Stopped interacting and relating to others as a solution to problems and is in his/her own fear driven world. Time and sequence do not matter below level 3.
↑	Level 1 Attachment Center	Alone	The one I love	Cravings	Cling or dismiss	Secure attachment	If I overestimate or underestimate the importance of feelings or relationships I likely have level 1 pain.	Not resolved by communication AT ALL.	Distorted view of relationships and what other people think and feel.
↑									

Four + Levels of Synchronization

	Level	Distinctive Pain	Malfunction	Recovery resources needed	Brain Region (added)	Brain Function	Capacities (added functions)	Principles from the Life Model	Spiritual Dimension
↑	Level 4+	Internal conflict	Incoherent dismembered identity (Lie based identity)	Internal spiritual	Left brain	Explanations	Autobiography (self over time)	Coherent Identity	Live from my heart
↑	Level 4	Loss of focus (direction) and reality	Immaturity (lack of complexity)	Community	Right prefrontal cortex	Focus your attention over time	Self in time (sequence)	Maturing	Act like true self (suffer well)
↑	Level 3	Continuing distress in big six feelings	Loss of relational capacity in continuing distress	Trained minds (trained control centers)	Right cingulate cortex (mother core)	Match energy levels	Shared states of mind (mind matching)	Recovering (Synchronizing)	Synchronize with God (Spirit led life) Stay relational
↑	Level 2	Pervasive fear	Fear bonds and mapping	A high capacity trained mind (trained control center)	Right amygdala (Guard shack)	Good, bad and scary	Engage or avoid	Receiving & giving	Love life (not death)
↑	Level 1	Painful existence	Distorted personal reality	Two bonded relationships for life	Thalamus and basal ganglion (attachment light)	What and who is personal	Personal reality	Belonging	Spiritual adoption
